

Personal Project – English / Turkish Translation.

OBJECTIVE

Aim of the project is to make easier to learn new foreign-word while reading a book. While reading a book when people see a unknown word, they generally use a dictionary and note the meaning of word under the line. Sometimes after few page when they read the same word again but they have already forgotten the meaning of the word. I wanted to develop personal dictionary to keep the newly learned words better in memory. Readers only need to save the meaning and sentence of word in their personal dictionary. It takes a time but in the long run users can improve the word reservoir while learn how to learn.
